Help
Improve Healing

What Does It Feel Like?

The laser beam burns the mole.

For a comfortable procedure, numbing cream or local anesthesia is recommended.

What to expect Post-Laser?

K-Laser Blue Derma minimises heat damage and inflammation in the surrounding tissues.

- ➡ Low to no discomfort post -aser.
- ➡ Fast healing and low infection rate.
- ➡ Precision and control to limit scarring.

How Many Sessions?

Only one session is usually required.
