K-LASER BLUE DERMA VASCULAR LESIONS

BLUE LASER - 445nm
High Affinity With
Hemoglobin in Blood Vessels

What Does It Feel Like?

The laser beam targets precisely the hemoglobin of superficial blood vessels. The laser feels like a mild prick on the skin as the blood vessels close. No numbing cream is required.

What to expect Post Laser?

K-Laser Blue Derma targets superficial blood vessels easily to reduce redness in the skin.

- ➡ Low to no discomfort post-laser.
- ➡ Precision to protect the surrounding tissues
- ➡ A mild redness can be seen for a few minutes to a few hours post-laser.

How Many Sessions?

Depending on the number and type of vascular lesions, it may take a single session or a few.
