K-LASER BLUE DERMA

How Does It Works?

What Does It Feel Like?

The laser beam burns the wart. Local anesthesia is recommended with large and numerous warts. The procedure is then faster and painless.

How Fast Are The Results?

In general, the skin heals in 3 to 4 weeks.

How Many Sessions?

Usually, 1 to 2 sessions are required to treat warts. It depends on the severity of the warts and how deep they are.
