

# Laser Treatment Wound-Ulcer

## Who Can Benefit From Class IV Laser Therapy?

- 1** Slow Healing Wound - Ulcer - Sore
- 2** Recent Trauma - Hematoma - Edema
- 3** Diabetic Foot - Vasculitis
- 4** Poor Blood Circulation In Legs

# K-LASER BLUE DERMA

## Photobiomodulation Effect

Wavelengths  
Red 660nm  
Infra-Red 970nm  
Blue 445nm

### What Does It Feel Like?

The laser beam is waved a few cm above the wound for 1-3 min. Nearly no sensation is felt and no anesthesia is required.

### When To Expect Results?

Non-healing wounds (months or years) usually show visual improvement within the next weeks. Complete resolution can take a few months depending on the wound's severity.

### How Many Sessions?

The effects are cumulative. Treat until healing. Your practitioner will establish the best protocol for your condition.

Recent Trauma: Every Other Day / Bandages  
Chronic Ulcers / Vasculitis: Once a week
